Stay Healthy This Winter With All-Natural Medicines

According to the Centers for Disease Control and Prevention, five to 20 percent of the population will come down with the flu each year. Colds are even more common, with the average adult catching two to four colds per year and children catching six to ten, according to the U.S. Department of Health and Human Services.

Just in time for this year's cold and flu season, **Hyland's, Inc.**, the nation's oldest manufacturer of all-natural medicines, introduces Sniffles 'n Sneezes 4 Kids – an all-natural, homeopathic medicine that relieves symptoms of the common cold, including sneezing, sore throat, runny eyes, runny nose and headaches. Specially formulated

for children 2-12 years of age, Sniffles 'n Sneezes 4 Kids comes as quick-dissolving tablets that melt like magic in a child's mouth. The product's active ingredient, Zincum Gluconicum, is clinically proven to shorten the duration of colds by nearly half.

Sniffles 'n Sneezes 4 Kids joins a full line of safe and effective all-natural medicines, including Hyland's popular Complete Flu Care and Complete Flu Care 4 Kids, specially formulated to make sure family members from age two to adult can avoid suffering from a long list of bothersome cold and flu symptoms. Both medicines offer an effective one-two punch: Give it to kids or adults early and reduce the length of time they are sick; take

it later to promote overall symptom relief from fever, body aches, chills, runny noses and headaches. And just like all homeopathic medicines, each of these cold and flu products is free of known side effects or interactions.

Hyland's products are available in drug stores and other major retailers nationwide, including Walgreens, Brooks, Eckerd, Wild Oats, and select independent drug and natural foods stores.
